Elasti-Deck Accelerator

ELASTI DECK

Technical Data Information

Accelerator

EZ Accelerator is a uniquely formulated liquid additive that will accelerate cure times when added to EZ moisture-cured polyurethane Elasti-deck products. It promotes uniform cures at temperatures as low as 35°F | 1.7°C and prevents excessive out gassing and surface frothing in high humidity conditions. Using the EZ Accelerator provides the applicator with a proven method to enhance the speed of cure in adverse application conditions.

DESCRIPTION

EZ Accelerator is a single-component, liquid-applied, moisture-cured polyurethane coating additive designed to provide a rapid cure with a slight upgrading of physical properties when added to EZ moisture-cured deck urethanes.

PACKAGING

Available in pints, quarts and 1 gallon containers.

FEATURES/BENEFITS

- Enhance the speed of cure in adverse application conditions
- Promotes uniform cures at temperatures as low as 35°F | 1.7°C
- Prevents excessive out gassing and surface frothing in high humidity conditions

APPLICATION

EZ Accelerator should be added to the moisture-cured urethanes at the job site. Use mechanical agitation for 2 to 3 minutes or until a uniform blend is attained. Take care not to entrap air during mixing. The careful addition of EZ Accelerator to the EZ Single component urethane deck products will allow a pot-life or application life of several hours.

TYPICAL APPLICATIONS

- Allows light traffic on decks coated with Elasti-Base or Elasti-Binder within a matter of hours at standard temperature & humidity
- Allows single coat applications of Elasti-Base coat up to 50 mils versus normal recommended application of 32 mills without use of Elasti-Base
- Slight increase in tensile strength of Elasti-Base with no discernible decrease in elongation
- 4. Slightly increases the abrasion resistance of Elati-Binder
- Allows coating applications in extremely high humidity (80% –100% RH) with no surface bubbling or blowing

INSTALLATION

EZ Accelerator use level is variable up to a limit of one pint per 5 gallons of coating. The higher the level of additive (up to the limit), the more improvement in the cure rate. Typical use levels with various products are as follows:

Technical Data		
Product	By Volume	Allowable Variance
Elasti-Base	2 oz per Gal	+ 15%
Elasti-Base	2 oz per Gal	+ 20%
Elasti-Binder	2 oz per Gal	+ 20%
Elasti-Binder	2 oz per Gal	+ 20%

PRECAUTIONS

Before using this product, read the container precaution label and SDS sheets carefully. Personnel should wear protective clothing and gloves, avoid contact of material with skin or eyes, and avoid breathing vapors. Mix and apply in well-ventillated areas and observe normal safety precautions. EZ Accelerator is classified as a corrosive material and can cause irritation in prolonged exposure. Wash thoroughly if product contacts skin. Consult SDS for further information.

AVAILABILITY

EZ products are available throughout the United States, Canada, and a number of other countries. Contact the EZ Sales Representative in your area for details.
